PRODUCTS TO BUY FOR MAINTAINING YOUR COATING

Our ceramic coatings are designed to resist chemicals from a pH of 1 to 12. **The key word is resist, not chemical proof!** Therefore, we always suggest that when our customers are washing the vehicle themselves, they should always be using a pH neutral car soap that **DOES NOT contain waxes in it**. These waxes can actually clog the pores of the coating, creating poor performance.

Ceramic coating “toppers” are products that can be applied during or after the wash process. They are simply an additional layer of protection that bonds to the coating. These ceramic based formulas increase coating longevity while yielding additional gloss, slickness, and boosting hydrophobics. **Products we recommend are....**

- **CarPro Reset (#1 Rated Soap)**
- **Armour Detail Amplify (Detail Spray)**
- **Gyeon WetCoat (Wet Applied Topper)**
- **CarPro Reload (Wipe On Topper)**

**ALL OF THESE PRODUCTS ARE AVAILABLE FOR
PURCHASE IN OUR FACILITY**

THINGS TO AVOID WITH YOUR CERAMIC COATED VEHICLE

SAY NO
TO CONTACT
AUTO
WASH

You want your coated vehicle to look its best and last the longest it possibly can. You spent your hard earned money having us perfect your paint. DON'T THROW IT DOWN THE DRAIN.

THINGS TO AVOID

- Contact Auto Washes
- Highly Acidic Chemicals
- Car Wash Brushes
- Ice Scrapers
- Sham Wows / Shammy

REASONING WHY

- Swirls Paint
- Degrades Coating
- Swirls Paint
- Swirls Paint
- Swirls Paint

ALTERNATIVES

- Touchless Washes (Occasionally)
- Ph Neutral Soaps
- Microfiber Wash Mitts
- Just Don't Use It On The Hood
- Microfiber Drying Towel

TIPS WHEN WASHING YOUR COATED CAR

USE A FOAM CANNON

A foam cannon is an incredibly useful tool that allows soap to remove the initial heavy grime in a touchless manner.

WASH TOP TO BOTTOM

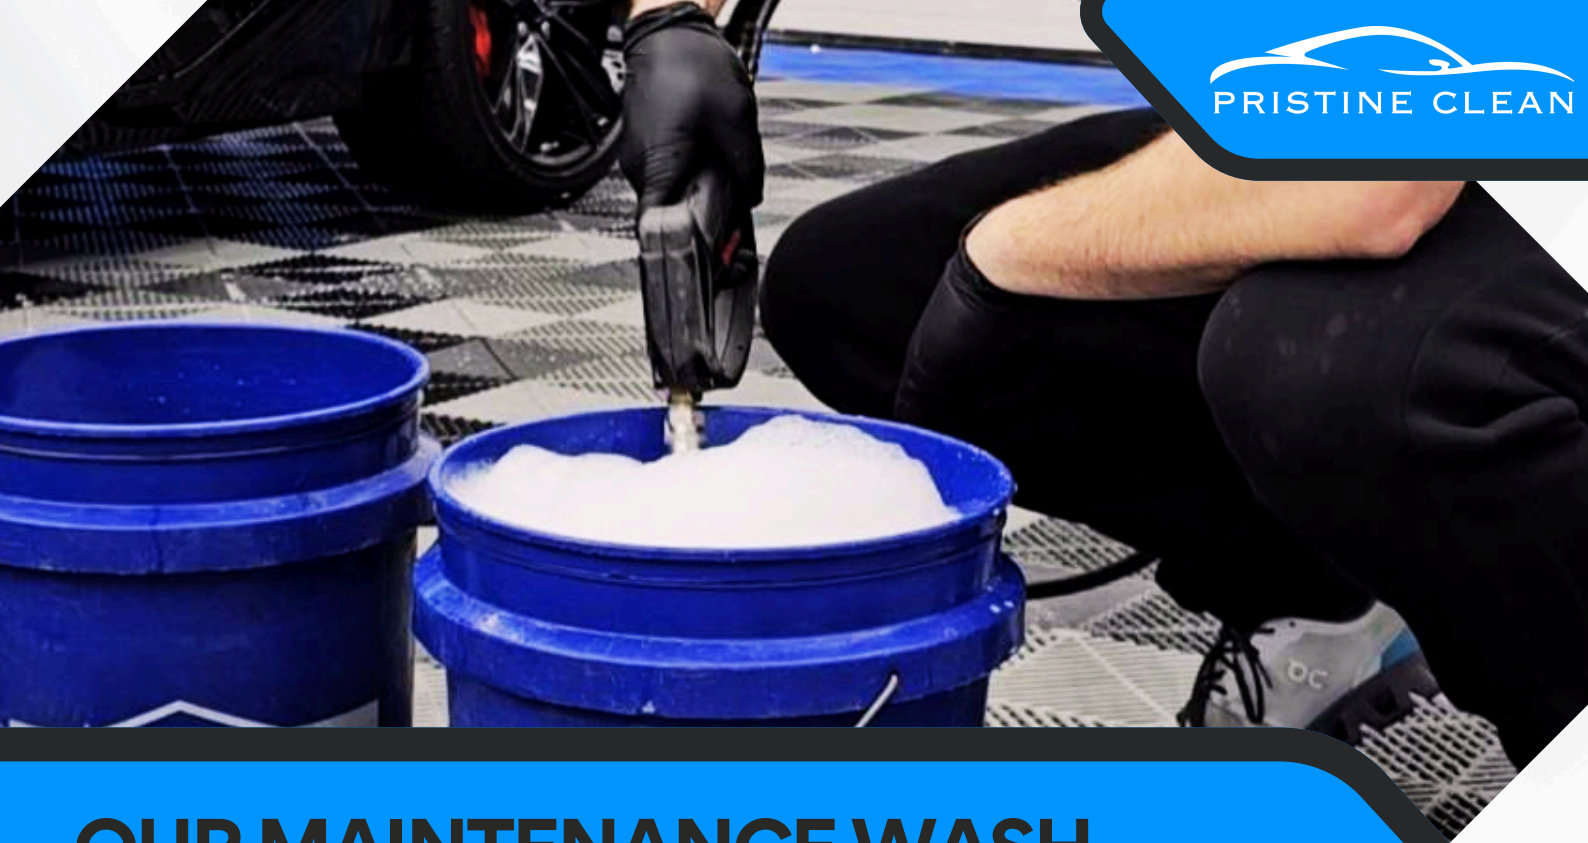

Washing top to bottom is important because the bottom of the vehicle is ALWAYS the dirtiest. Washing from the top first helps prevent swirls and marring of the paint from the heavy grime on the bottom of the vehicle.

TRY TO AVOID WASHING AT PEAK SUNLIGHT

If possible, avoid washing at high heat / peak sunlight hours. It's best to wash your vehicle in cloudy weather, earlier in the morning, or during evening hours. You do not want to chase water or various chemicals from drying on your paint.

NEVER LET COATING TOPPERS DRY ON PAINT

These products are STRONG and can be very difficult to remove if dried on paint from heat/sunlight.

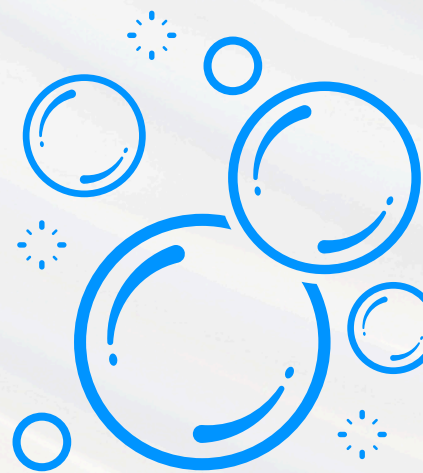

OUR MAINTENANCE WASH PROGRAM EXPLAINED

As part of maintaining our coating guarantee, we require seeing your car to perform a ceramic maintenance wash at minimum once a year.

WHY DOES MY COATING NEED THIS?

Every thing in life needs kept up on. This includes everything from motors in cars to each and every one of ourselves. Without maintenance and upkeep, things fall apart. There's no magical pill to avoid this.

WHAT DOES THIS MAINTENANCE ENTAIL?

Our coating maintenance include using a variety of professional grade products to unclog your coating from a variety of things like road film, tar, salt stains, etc. All of these things bond to the coating rather than your paint but as they build up, you'll notice decreased hydrophobics. That's when you know you need a deep wash.

We use a variety of acidic, alkaline, and ph neutral chemicals including car soaps, tar removers, water spot removers, iron particle removers, and plenty more to ensure that your coating is fully unclogged, yielding a clean slate hydrophobic, easy to clean coating.

These products require trained professionals to use properly in a specific order and **we never recommend customers to try this level of thorough maintenance.**

Thank You

Dear Valued Customer

Thank you. Not only for trusting us in transforming your ride to a glossy, jaw dropping shine with ultra durable protection but for also taking the time to read through this maintenance guide for your vehicle.

You are the BEST type of client to have; one that truthfully cares about keeping their vehicle in its best shape just as much as we do. For more tips, tricks, and to keep up to do date with any changes from within our business, be sure to follow us on social media and subscribe to our Youtube channel, PristineCleanPGH.
